CAO'S REPLY STATEMENT TO DENMAT'S RESPONSES
TO CAO'S STATEMENT OF UNCONTROVERTED FACTS

Pursuant to Local Rule 56-1, Defendant and Counterclaim Plaintiff CAO GROUP, INC. (“CAO”) submits the following Reply Statement to the Responses filed by Den-Mat Holdings, LLC (“DenMat”) to CAO’s Statement of Uncontroverted Facts.

Uncontroverted Fact	DenMat’s Response	CAO’s Reply
1. In 2015, CAO sued Den-Mat Holdings, LLC (“DenMat”) for patent infringement over certain patents related to products sold by DenMat (“the Patent Lawsuit”). The action was stayed while the United States Patent and Trademark Office (“USPTO”) conducted a reexamination of one of the patents in question, which it completed in July 2017, verifying CAO’s patent rights. DenMat Compl. at 2:11-16; CAO Answer and Countercl. at 10:10-22.	Undisputed.	The fact is established.
2. In November 2017, DenMat and CAO entered two agreements: (i) a Nonexclusive Patent License (“the License Agreement”); and (ii)	Disputed; the \$800,000 in payments were not based on an “anticipated judgment” CAO would have received against DenMat in the Patent Lawsuit.” The \$800,000 in payments were in consideration for CAO’s	The fact is established. DenMat’s attempt to create a disputed issue is neither material to the issues before the Court on CAO’s Motion for Partial Summary

Undisputed, though DenMat's statement seems to imply that DenMat's payment of \$200,000 to CAO had something to do with the Manufacturing Agreement. It did not. DenMat's owed this payment, and made it, pursuant to the terms of the License Agreement, not the Manufacturing Agreement. Section 4.1 of the License Agreement expressly states that DenMat was to pay the \$800,000 License Issue Fee to CAO, including the first payment of \$200,000, in consideration for the license that CAO granted to DenMat under the License Agreement,

CAO 002655 (attached to Tiberi Decl. at Exh. 9).	Disputed, but this statement does not raise a genuine issue of fact that is material to the issues before the Court on CAO's Motion for Partial Summary Judgment. DenMat's statement is also contradicted by the evidence, and not supported by the evidence it cites. DenMat's statement mischaracterizes the document cited. The document is not a request from CAO for DenMat's laser component prices, nor a response from DenMat to such a request. The cited document is a single e-mail selected from a larger exchange between the parties, and it is taken out of context. The e-mail exchange regards an option that DenMat held under Section 4.2 of the Manufacturing Agreement to require CAO to purchase DenMat's existing inventory at the lesser of: DenMat's material cost plus 4%, or the fair market

It supports the fact that the difference between the fair market price and DenMat's cost was an important concern for CAO, as it states that the first option to resolve these concerns is to "[d]ecrease purchase cost of transferred inventory to match current market price," which was CAO's right under Section 4.2 to pay the lower price, if DenMat decided to exercise its option.

These communications included exchanges of the sale prices that the parties were proposing for the products to be made by CAO, which were dependent on the respective cost information known to the respective parties. Dkt. No. 55-23, CAO Decl. 7/8/19, ¶ 64. CAO would send its calculated pricing information to DenMat, which was based on CAO's estimation of its costs to make the products, and request that DenMat respond with DenMat's calculated pricing information, which was based on DenMat's known costs to make the products. Dkt. No. 55-23, CAO Decl. 7/8/19, ¶ 65.</p> <p>However, DenMat declined to provide CAO with the information about its known costs at the time the parties were exchanging these communications. Dkt. No. 55-23, CAO Decl. 7/8/19, ¶ 66. The parties therefore calculated the final sales prices for the products that CAO was to make based on the calculations from CAO, which were generated based on what it would cost CAO to make the products using its own vendors and components, and which would allow CAO to make a profit</p>

<p>24. CAO's laser pricing was based on "somewhat similar articles" for which CAO had "some pricing" information rather than the actual prices for DenMat's lasers. Cao Depo. at 80:17-81:16, 82:9-20 (attached to Tiberi Decl. at Exh. 1); Larsen Depo. at 14:16-15:15, 51:9-25 (attached to Tiberi Decl. at Exh. 2); DEN00630-00631 (attached to Tiberi Decl. at Exh. 10).</p>	Undisputed.
<p>25. CAO did not consider whether the "somewhat similar articles" would satisfy FDA and European Union electrical safety testing under IEC 60601 or other regulatory requirements. Larsen Depo. at 57:9-21 (attached to Tiberi Decl. at Exh. 2).</p>	<p>Disputed, but this statement does not raise a genuine dispute of fact regarding any issue before the Court on CAO's Motion for Partial Summary Judgment, and it is not supported by the evidence DenMat cites.</p> <p>DenMat's statement grossly mischaracterizes the cited witness testimony. Mr. Larsen's testimony explicitly references the testing needed to meet safety standards. Dkt. No. 55-11, Kopp Decl. 7/8/19, ¶ 9, Ex. N (Larsen Depo. 57:3-21). He stated that he did not know in September 2017 whether some of the components listed met certain criteria, but nowhere in Mr. Larsen's testimony is there a statement that CAO simply failed to consider whether components would be able to pass safety tests and regulations.</p>

Plaintiff's Uncontroverted Facts and Supporting Evidence	Defendant's Facts and Supporting Evidence
<p>26. For its part, DenMat had no knowledge of how CAO estimated CAO's cost to make the lasers. Casper Depo. at 91:13-92:2, 129:21-130:3, 251:2-10 (attached to Tiberi Decl. at Exh. 4); Cao Depo. at 96:4-13 (attached to Tiberi Decl. at Exh. 1); Casper Decl., ¶ 10.</p>	<p>Disputed, but this statement does not raise a genuine dispute of fact regarding any issue before the Court on CAO's Motion for Partial Summary Judgment, and it is not supported by the evidence DenMat cites.</p> <p>DenMat knew that CAO was calculating its cost to make the lasers based on information that would allow CAO to make a profit on each laser sold to DenMat. DenMat further knew that CAO was not calculating its cost to make the lasers based on any intention to use DenMat's existing vendors and components.</p> <p>DenMat admits that the objective of the parties was not to enter an agreement that would cause CAO to suffer a loss, but to enter an agreement that was mutually beneficial. Dkt. No. 55-9, Kopp Decl. 7/8/19, ¶ 7, Ex. L (Cartagena Depo. 161:18-25 to 162:2.). Therefore, when the parties were negotiating the settlement, DenMat knew that the sale prices CAO agreed to accept for each laser under Section 5.2 of the Manufacturing Agreement (\$1,129 for each SOL; \$1,029 for each NV) were calculated</p>

	<p>to benefit CAO. Dkt. No. 55-6, Kopp Decl. 7/8/19 ¶ 4, Ex. H, § 5.2. (Manufacturing Agreement).</p> <p>As DenMat also knew at the time the parties were negotiating the settlement, the final sale prices that CAO agreed to accept for each laser it made were lower than the basic costs for DenMat to make each laser, using DenMat's existing vendors and components. Dkt. No. 58-1, Hoggan Decl., ¶ 2, Ex. 1 (Tiberi E-mail 4/1/19) (ATTORNEYS' EYES ONLY). Therefore, DenMat knew at the time the parties entered the Manufacturing Agreement that the only way CAO could make money by selling the lasers at the prices set forth in Section 5.2 of the Manufacturing Agreement, was to pay lower costs by using alternative vendors and components, rather than using DenMat's existing vendors and components.</p>
<p>27. DenMat had no knowledge of CAO's volume buying power for laser components, internal business model, manufacturing efficiency, or any other factors CAO may have considered in negotiating the terms of the contract. Casper Depo. at 91:13-92:2, 129:21-130:3, 251:2-10 (attached to Tiberi</p>	<p>Disputed that DenMat had no knowledge of "any other factors CAO may have considered in negotiating the terms of the contract." Dkt. No. 55-23, Cao Decl. 7/8/19, ¶ 7.</p>

	<p>23, CAO Decl. 7/8/19, ¶ 36.</p> <p>DenMat knew at this time, and had known from the time the parties settled the patent infringement case and entered the Manufacturing Agreement, that CAO would suffer a loss on every laser produced under the Manufacturing Agreement if it was forced to use only DenMat's existing vendors and components. The final sale prices that CAO agreed to accept for each laser it made, set forth in Section 5.2 of the Manufacturing Agreement, were lower than the basic costs for DenMat to make each laser, using DenMat's existing vendors and components. DenMat admits that as of October 2017, its costs to make each laser, using DenMat's existing vendors and components, were higher than the prices set forth in Section 5.2 of the Manufacturing Agreement. Dkt. No. 55-6, Kopp Decl. 7/8/19, ¶ 4, Ex. H, § 5.2 (Manufacturing Agreement); Dkt. No. 58-1, Hoggan Decl., ¶ 2, Ex. 1 (Tiberi E-mail 4/1/19) (ATTORNEYS' EYES ONLY). DenMat later expressly acknowledged that CAO would suffer a loss if DenMat failed to approve alternative vendors and components, stating "the</p>

3		DenMat further admits that the Manufacturing Agreement does not contain language requiring that DenMat's products must be made with only DenMat's 'existing' components from DenMat's 'existing' suppliers, essentially admitting that its representations to CAO on this point were false. Dkt. No. 55-10, Kopp Decl. 7/8/19, ¶ 8, Ex. M (Casper Depo. 257:7-24). In reality, Section 9.5 of the Manufacturing Agreement does not require that CAO only use DenMat's existing vendors and components to make the products, but allows CAO to make changes, with DenMat's approval. Dkt. No. 55-6, Kopp Decl. 7/8/19, ¶ 3, Ex. H, § 9.5 (Manufacturing Agreement).

<p>35. CAO's May 16, 2018 proposal (the "Proposal") demanded that DenMat evaluate and approve some 145 separate new laser components; in effect, CAO insisted it would not make DenMat's lasers—it would make CAO's lasers. CAO 000250-000255 (attached to Tiberi Decl. at Exh. 9).</p>	<p>Disputed, but this statement does not raise a genuine dispute of material fact regarding any issue before the Court on CAO's Motion for Partial Summary Judgment. Cao Depo. at 64:17-65:3, 123:25- 125:16 (attached to Tiberi Decl. at Exh. 1); Larsen Depo. at 54:24- 57:13 (attached to Tiberi Decl. at Exh. 2).	Undisputed.
44. CAO's only "evidence" is DenMat's consistent acknowledgement, post-execution, that the Manufacturing Agreement did not prohibit CAO from sourcing components from alternative vendors, subject to validation and DenMat's approval, as set forth in Section 9.5 of the Manufacturing Agreement. DEN 01082-01083 (attached to Tiberi Decl. at Exh. 10).	Undisputed that before DenMat abruptly refused to consider alternative vendors and components, and insisted that CAO should only use DenMat's existing vendors and components and therefore suffer a loss on every laser made, DenMat had maintained a different position: that CAO would be permitted to replace DenMat's existing vendors and components with alternatives.

<p>45. CAO failed to resume performance under the Manufacturing Agreement after (if not before) DenMat declined its May 16, 2018 proposal. This statement is not supported by the evidence it cites, and it is contradicted by the other evidence on record.</p> <p>According to DenMat, CAO was still requesting information from DenMat, through May 24, 2018, which CAO needed to build the lasers. Dkt. No. 55-10, Kopp Decl. 7/8/19, ¶ 8, Ex. M (Casper Depo. 167:24-25 to 168:1-20, 169:16-25 to 170:1-5). DenMat has also admitted that it did not stop working with CAO under the Manufacturing Agreement until early June 2018. Dkt. No. 55-9, Kopp Decl. 7/8/19, ¶ 7, Ex. L (Cartagena Depo. at 253:9-15, 254:15-20).</p>
<p>46. On May 24, 2018, Dr. Cao wrote to DenMat's CEO that rather than CAO perform by making DenMat's lasers, "DenMat will pay ongoing royalty for CAO lasers and tip sales per license agreement, it will be 10% of net sales starting Jan. 1, 2018." CAO 002865-002866 (attached to Tiberi Decl. at Exh. 9).</p>	<p>Disputed, but this does not raise a genuine dispute of material fact regarding the issues before the Court on CAO's Motion for Partial Summary Judgment. 2		Cao's e-mail is there any statement that CAO intended to do anything "rather than" perform under the Manufacturing Agreement, as DenMat's statement alleges. Dr. Cao's statement is actually a summary recitation of obligations that DenMat owes under the License Agreement. Dkt. No. 55-7, Kopp Decl. 7/8/19, ¶ 4, Ex. I, § 4.2 (License Agreement).
3		DenMat's citation to this e-mail is also misleading, as DenMat selectively clipped it from a larger e-mail exchange between David Casper and Dr. Cao, and omitted the remainder of the exchange. Dkt. No. 55-16, Kopp Decl. 7/8/19, ¶ 14, Ex. S (DEN 700-701). In Dr. Cao's May 30, 2018 follow-up e-mail to Mr. Casper, Dr. Cao again repeats CAO's intention to perform under the terms of the Manufacturing Agreement: "I just want to let you know that it is our intention to provide DenMat with equal or better products with our sourcing. Any changes of vendors will have DenMat approval before proceed the change. I believe that we can have a win-win solution as I proposed." <i>Id.</i>

	<p>is not supported by the testimony it cites.</p> <p>The testimony cited from Robert Cartagena does not say that CAO ever demanded that DenMat issue the Initial Purchase Order, as it is defined in Section 7.1 of the Manufacturing Agreement. Dkt. No. 55-6, Kopp Decl. 7/8/19, Ex. H (Manufacturing Agreement) § 7.1. DenMat admits that because the parties never completed the manufacturing logistics phase of their work together, the Initial Purchase Order was not due, and questions around its timing are “irrelevant.”</p> <p>David Casper, DenMat's Chief Executive Officer and appointed representative under Rule 30(b)(6), admits that the manufacturing logistics phase was not completed because the parties did not complete the process validation. He testified: “As it clearly states in Section 7.1, the initial purchase order is to be issued after the manufactured initial logistics were completed, which includes process validation to your point, and we had not gotten there yet.” Dkt. No. 41-16, Kopp Decl. 6/24/19 (Casper Depo. 153:24-154:3).</p>

<p>62. After CAO received DenMat's Initial Purchase Order, its Vice President of Operations wrote to DenMat: "Thank you for sending over your PO's." CAO 002694 (attached to Tiberi Decl. at Exh. 9).</p>	<p>Undisputed. The cited e-mail further states that because DenMat still had not provided CAO with information that CAO needed to build the lasers, CAO would not be able to deliver finished products to DenMat by the due dates in the purchase orders.</p>
<p>63. As a matter of commercial reality, for purposes of inventory control, supply chain, and cash flow, it is standard for a buyer to issue purchase orders for manageable quantities of products to be delivered over time, which is what DenMat did. Casper Depo. at 158:18-25 (attached to Tiberi Decl. at Exh. 4).</p>	<p>Undisputed, immaterial to this case and the issues before the Court on CAO's Motion. What is "standard" has nothing to do with the specific requirements for the "Initial Purchase Order" at issue in this case, which is a defined term in the Manufacturing Agreement.</p>
<p>64. The Initial Purchase Order was comprised of six pages and timely was issued by DenMat for the quantities of products set forth in Section 7.1 of the Manufacturing Agreement. CAO 002676-002684 (attached to Tiberi Decl. at Exh. 9); DEN 00001-00021 (Section 7.1) (attached to Tiberi Decl. at Exh. 10).</p>	<p>Disputed, but this statement does not raise a genuine dispute of material fact regarding the issues before the Court on CAO's Motion. DenMat's statement is not supported by the evidence it cites, and is contradicted by the evidence on record.</p> <p>It is undisputed that DenMat did not send a single purchase order which meets the definition of the "Initial Purchase Order" under Section 7.1 of the Manufacturing Agreement. 3		The evidence is also uncontroverted that it was DenMat's option, not CAO's, under Section 4.2 of the Manufacturing Agreement, to require CAO to purchase components from DenMat's existing inventory before CAO could purchase components from any other sources. Dkt. No. 55-6, Kopp Decl. 7/8/19, Ex. H (Manufacturing Agreement) § 4.2. DenMat admits that it never told CAO one way or the other whether DenMat intended to exercise its option under Section 4.2. DenMat's willingness to sell CAO its components, at a loss to DenMat, rather than haggle over price, was caused by CAO's failure to initiate, let alone maintain, a supply chain, for the manufacture of DenMat's lasers. Disputed, but this statement does not raise a genuine dispute of material fact regarding the issues before the Court on CAO's Motion. None of the documents and testimony cited by DenMat supports this statement, and the evidence on record contradicts it.

CAO repeatedly requested that DenMat tell CAO whether DenMat intended to exercise its option under Section 4.2, and if so, to please provide CAO with the cost information for the items DenMat wished to sell to CAO from its existing inventory, so that the parties could determine whether CAO would pay: DenMat's material cost plus 4%, or the fair market price, whichever is less. When CAO presented DenMat with information showing that the fair market price for the

Dkt. No. 41-16, Kopp Decl. 6/24/19, ¶ 5, Ex. A (Casper Depo. 134:19-21, 198:17-25). It is uncontroverted that CAO made lasers during the process validation and delivered them to DenMat, whereupon those lasers passed DenMat's inspection. Dkt. No. 55-30, CAO Decl. 7/8/19, ¶ 49, Ex. 19 (CAO 000097). By DenMat's own definition of "sellable" lasers, CAO clearly delivered lasers that were "of value" to DenMat.</p>

Dkt. No. 55-7, Kopp Decl. 7/8/19, Ex. I (License Agreement) § 4.1. DenMat made the first payment, in the amount of \$200,000, toward the total \$800,000 it owes, in exchange for CAO granting DenMat a license to use CAO's patents.

According to CAO's documents produced in discovery, CAO spent a total of \$240.00 on components for DenMat's lasers, which was for paper labels and brochures that cost between 13 and 22 cents each.
